

## **Super Cures which could be beyond imagination and even desires at Rog Niwaran Camp Ludhiana, September 2009.**

What becomes desire is when there is some possibility of getting that thing done. And evidently one must have seen that thing happening to others then only one desires some thing. But here something which organizers like me cannot believe that that can happen immediately to toddlers or severely mentally challenged children who don't understand any thing of Gurbani. There is no word to describe such cures.

1. Japanjot Singh aged 3 years S/O Sarvpreet Singh 259 R, MT Ludhiana  
Phone 98156 42877

Diagnosis: Extra Ventricular Obstructive Hydrocephalus [EVOH] This is congenital and genetic disorder and only cure is surgical intervention where in shunt is placed to relieve the pressure in the brain. The child had attended healing sessions of one hour from the last 5 months. The vision, the spasm of feet, crying had stopped. His ever increasing size of head had stopped. He did not require any medicine. He is going to the school.

2. Khushpreet Singh aged 6 months S/O Lakhveer Singh, Vill. Bagli Khurd, Near Doraha, Distt. Ludhiana. Phone: 95928 02144

Diagnosis: Cyanotic Heart Disease VSD  
How this child started smiling without any medicine where as he was being given Tab Inderal 10mgm ¼ twice daily to stop his crying. He would start crying and would require this medicine to make him quiet within 10 minutes. He would keep crying unless this medicine was given. What made him comfortable need further evaluation by the medical community?

3. Jagjot Singh age 1½ S/O S.Amrik Singh, Jaswant Nagar, Near Samrala Chowk, Ludhiana Phone: 98881 13783

Diagnosis: Celiac disease  
On eating wheat, he used to get lose motions, vomiting, pain abdomen some time had to be admitted. It was severe form of allergy. He was growing weak.

All the symptoms just vanished in the healing camp. He took wheat all the five days in the camp. His relief is remarkable.

4. Gureen Kaur age 8 yrs D/O Jagdeep Singh Dhillon. Kesari rly station. Ambala

Blood cancer-ALL-L1, cerebral atrophy and cerebral TB

Severely handicapped child showing steady improvement each time she is brought to the camp at Ludhiana from Sep 2008. Her reflexes are improving and responds to the stimuli. She had grown in height and showing over all improvement in her body functions. This is beyond imagination.

**Other cases who presented themselves in the camp.**

**Record number of cases of Celiac Disease who got well in 5 days – a world record.**

1. Gurpreet Singh 11yrs
2. Harsimrat Kaur 11 yrs
3. Arshdeep Kaur 15 yrs
4. Agam Singh 4½ yrs
5. Dharamvir Singh Makkar 34 yrs
6. Gurpreet Kaur 30 yrs.
7. Gurkaran Kaur 1½ yrs
8. Surveen Kaur 5 yrs
9. Sangeeta 58 yrs
10. Hiya 5½yrs
11. Tanya 15 yrs
12. Jagjot Singh 1½yrs
13. Paramjit Kaur 48 yrs
14. Sushama Rani 39 yrs
15. Sehajgun Kaur 4 yrs
16. Gursimar Singh 2yrs

Cases of cancers, kidney failures, and severely mentally challenged children visited the healing camp and all of them felt happy and satisfied.
